

Newsletter

On June 14th a ~~significant~~ large delegation from the FCC, headed by Commissioner Robert E. Lee and Chief of ^{the} Division of Research and Education ^{DR.} Hyman Goldin, attended a demonstration of the first on-air "closed-circuit" in-school television distribution system. The U.S.O.E., N.A.E.B. and NET were also represented. The demonstration was made ^{by Adler Electronics} to support the FCC proposals to open the 2000 megacycle band for educational telecasting in specific areas on low power. A detailed description of this demonstration and an evaluation of its potential will appear in the Fall NAEB Journal.

ALL-CHANNEL LEGISLATION PASSES SENATE

②

The all-channel television receiver bill passed the Senate ~~this week~~ June 14 and was sent back to the House for concurrence. The only change was the addition of requirements for adequate reception, which in effect allows the FCC to establish minimum performance standards. It is expected that the House will concur without the delay of conference.

③

①

This week the NAEB signed two survey and study contracts with the U. S. O. E. The first contract is for a study of the most efficient and useable distribution of ~~all~~ available television channels using electronic digital computer methods. This study will be made with the support and cooperation of the FCC. All alternatives will be considered, but it is hoped that the final distribution will add more than a thousand channel allocations to the present table without disturbing any present assignments. —
The second contract is for an ^{inventory} ~~study~~ of professional personnel available for the various categories of educational and instructional television, and a study of future training needs to provide for the rapid development of ETV in all areas of use. It is expected the first study will be completed by Christmas and the inventory study by March, 1963.

WTDS OFF THE AIR

On June 14, the FCC granted the request of the Toledo Board of Education ~~for cancellation~~ for cancellation of its license to operate WTDS, non-commercial educational FM station, and the call letters were deleted.

~~NOT~~

NORTH DAKOTA SEEKS VHF CHANNEL

The FCC, ~~has announced~~ on June 13, invited comments to Notice of Proposed Rule Making looking toward deleting commercial Ch. 7 from Jamestown, N.D., and assigning it to Bismarck to be reserved for noncommercial educational use. This change was petitioned for by commercial KXMB-TV, Bismarck, State Dept. of Public Instruction, Bismarck Public and Parochial School Systems, and the Bismarck Junior College.

MULTIPLEXING AUTHORIZED FOR ERN

On June 13, the FCC granted Subsidiary Communications Authorizations to WGBH-FM, Boston, and WFCR(FM), Amherst, to transmit educational programs over multiplexed sub-channels for specialized audiences and to relay educational programs in connection with a proposed educational FM network in that area; and waived rules to permit remote control operation.

TIME FOR COMMENTS IN PRE-SUNRISE OPERATION EXTENDED INDEFINITELY

The FCC has extended indefinitely the time for filing comments concerning pre-sunrise operation by AM broadcast stations pending issuance of further rulemaking in this proceeding (Docket 14419).

MAINE ETV REFERENDUM PASSES

On June 18, voters in Maine approved, 24,235 to 21,329, ~~construction~~
~~money~~ \$1,400,000 for the construction of a state ETV network. Proponents of
the measure ~~had~~ been working to gain support for a year in advance of the
referendum. It is anticipated that at least 5 VHF stations will eventually
be constructed~~y~~ and will be tied in with the Eastern Educational Network.

MISCELLANEOUS
/FCC ACTIONS

(Kump-fm) Granted (June 1) license for new non-commercial educational FM station to Board of Regents, Univ. of Minnesota (for Duluth Branch).

Granted (June 1) license covering change in ERF, antenna system, height, location, and new transmitter to KLUW(FM), Municipal Univ. of Wichita (Kans.).

~~Granted (June 5) permission to remain silent during summer months to WSAJ, Grove City (Pa.) College, and KBPS, Benson Polytechnic School, Portland, Ore.~~

Granted (June 8) permission to remain silent during summer months to WSAJ, Grove City (Pa.) College, and KBPS, Benson Polytechnic School, Portland, Ore.

Granted (June 12) authority to WSUI, State Univ. of Iowa, to reduce hours of operation to a minimum of 6½ hours daily Aug. 6 - Sept. 22.

On June 13, denied petition of First Presbyterian Church of Seattle (KTW) for reconsideration of Jan. 10 Decision granting application of Washington State Univ. ~~for renewal~~ (KWSC, Pullman) for renewal of license and expanded hours of operation. (For details, see Washington Report, Vol. III, No. 1, Jan. 20, 1962.)

On June 13, granted petition by commercial applicants in Rochester, N.Y. Ch. 13 comparative proceeding to enlarge issues to add financial qualification determination of applicant Rochester Area ATV Assn., Inc.

On June 13 denied petition by WPOW, New York, N.Y., to enlarge issues on renewal of licenses for share-time stations WPOW, WEVD (New York, N.Y.), and WHAZ (Rensselaer Polytechnic Institute, Troy, N.Y.), to determine whether WHAZ can operate during daytime hours concurrently with WPOW or WEVD and whether WHAZ antenna system complies with FCC technical requirements. (WHAZ is not seeking daytime operation, and the FCC had earlier - June 5 - granted motion by WHAZ for further prehearing conference July 9, in lieu of hearing on that date in proceeding.)

*Perhaps this
would be
WR - meeting ??*

FCC AUGUST RECESS

Following its annual practice, the Commission will schedule no hearings or oral arguments during August, and will hold its statutory-required monthly meeting on Wednesday, August 1. This summer recess is a convenience to vacation and other planning by those who do business with the Commission. Different Commissioners will be present in August to handle emergency matters and expedite the Commission's routine business.

- FCC -

Within the past six months

with the FCC

Since January 1962, the ^{THE} NAEB has filed its report on the Needs of Education For Television Channel Allocations with the FCC, together with specific recommendations for additional channel reservations for Education based upon a National Plan; a separate procedure for handling Educational applications; and a study of channel distribution systems that might expand the number of available channels; and a supporting Comment on Docket No. 14229 based upon the Report and its recommendations. Since that time, the FCC has ^{already} acted affirmatively in most of the NAEB recommendations. It established a Division of Research and Education with an Educational Broadcasting Branch. It ^{has advanced} ~~modified~~ ^{WORK ON} the application forms for educational applicants. It recognized the established educational need for a prime single national coverage, and for multiple channel service in defined areas. ^{and} On Wednesday, May 23, the F.C.C. issued the following statement:

Insert No. 1

This statement was issued after several conferences between the staff of NAEB and the Staff and Members of the FCC. ^{We anticipate they will} ~~It means that all the~~ ^{result in all} proposed State Plans ^{have} ~~will be~~ considered and approved, where feasible and possible without regard to the overall proceedings affecting re-allocation of channels. ^{In effect, this procedure strikes the state ETV plans out of a log jam which might have unnecessarily retarded the processing of applications for ETV facilities grants.} On Monday, June 4, 1962, the NAEB filed an amended Comment to Docket No. 14229 which contains a recommendation for 735 additional channels to be reserved for education, making a total of 1010 channels to be made available for education from the present television portion of the spectrum. These include all of the channels asked for in all state plans now developed. ^{It is apparent} ~~It means that~~ The NAEB proposed Table of Assignments ^{is} ~~is~~ ^{to} be considered as a basis for the FCC reappraisal of its allocation program.

June 21

" The Commission is reappraising its TV Allocation Program announced last July 28. By separate order the date for filing reply comments in the de-intermixture proceedings in Dockets 14239 through 14246 and in the short-spaced assignment proceedings in Dockets 14231 through 14238 is being extended from June 22, 1962 to July 23, 1962. In view, however, of the recent enactment of legislation designed to lend financial aid for the construction of educational television stations, the Commission is hopeful that the state-wide proposals for educational television already noticed for rule making in 14421 - 14396 - 14409 and the allocation proposals in the overall VHF proceedings in Docket 14229 may be concluded as presently scheduled. Accordingly notice is hereby given that reply comments in Dockets 14229 - 14421 - 14396 - 14409 must be filed by the June 22, 1962 date which now governs. "

NAEB ~~WEEK~~ FILES AGAINST LICENSING FEES

The NAEB filed comments with the FCC opposing license fees for "non-commercial educational services conducted by tax exempt organizations." The comments, based on a decision of the NAEB Board of Directors at its meeting in Columbus, May 2, stated, ~~"Both public policy and practical considerations require that the Commission's services for non-commercial educational operations be rendered without charge."~~ The position was ~~also taken~~ that such exemption should be accorded all non-commercial educational stations operated by tax exempt organizations whether ~~them~~ or not/th station is operated on a reserved channel.

ALL-CHANNEL RECEIVER LEGISLATION

The Senate Interstate and Foreign Commerce committee approved (14-2) HR-8031, providing for the inclusion of both UHF and VHF in all television receivers manufactured or sold ~~for~~ interstate trade. The bill, previously approved by the House, will soon be considered by the Senate where the chances of passage appear moderately good, although many Senators have expressed reluctance to approve legislation which will require their constituents to pay more for a set when there is little or no UHF service in their areas. However, ^{it} has been pointed out to these Senators that growth and expansion of ETV are largely dependent upon UHF, and this legislation is needed to insure ^{full} UHF utilization ~~and development~~.

HARLEY NAMED TO JOINT NAB-JCEB COMMITTEE

NAEB President William Harley has been named ~~by~~ to a joint committee "to promote cooperation between educational and commercial broadcasting." Five commercial broadcasters were named by NAB President LeRoy Collins, and JCEB Chairman Robert C. Anderson designated the five members to represent educational broadcasting. ~~In addition to Harley, these are: James Robertson, NETRO vice president; NEA Asst. Exec. Secretary Lawrence Derthick; Ex. J. W. Edgar, Texas State Commissioner of Education; and U. of Nebraska Chancellor Clifford M. Hardin.~~ The committee held its first meeting in Washington June 4. ^{and considered such topics as} standards of legitimate underwriting for ETV, development of personnel, and cooperation on mutual projects.

REGULATIONS BEING DRAWN UP FOR ETV FEDERAL GRANTS

It is anticipated that the administrative structure for administering ETV grants, ~~which has been completed and is in final stages of completion~~ including the necessary rules and regulations governing the grants, will be completed ~~within the next two months~~. Also, within that time, Congress will probably have appropriated funds for the first year's grants. ~~While it is not possible to predict how much money will be available the first year, it seems unlikely that any maximum grants will be made during this initial period.~~

It is expected that an eligibility date will be established by the Secretary of HEW in the near future in order to protect matching rights, in so far as possible, of those applicants wanting to proceed with construction plans. However, potential applicants ~~should be~~ cautioned that, regardless of such a date, HEW can't assume any responsibility for any commitments applicants may make before they specifically receive a grant. ~~Certain expenditures might not fall within the purview of the act, as interpreted, and applicants cannot not assume that expenditures or commitments will be honored for matching funds until their application for a government grant has actually been approved.~~ The HEW ETV office is currently concerned with the definition of what actually constitutes a "project." Pending final definition, it is currently felt that a proposal which would merely enhance an ETV operation would not qualify as a project, but that the operation would have to be expanded through expanded service to more people or a greater area, or both. ~~No final~~ decision has been made, either, on whether or not purchase of an existing commercial station would constitute an eligible project.

The ETV office of HEW would welcome views or comments on how educational broadcasters think the law should be interpreted. Any questions you may have will also be welcomed and used as a basis for final interpretation. Send your comments or questions to Dr. John W. Bystrom, Asst. to the Secretary for ETV, Office of the Secretary, Dept. of HEW, Washington 25, D.C.

However, it has been established that grant applicants must either hold a license for an ETV station, or have applied to the FCC for a CP, and that such license or application must be for a reserved channel.

WASHINGTON REPORT

ALL-CHANNEL RECEIVER DEVELOPMENTS

On July 10th the President signed the all-channel receiver bill, ^{regarding all TV receivers shipped in, intermediate commercial channels of the 70 UHF are adequately receiving the 12 VHF channels} considered of ^{This is extremely important to education because if the FCC doesn't get UHF} extreme significance in its impact on development of UHF, in which education ETV has two-thirds of its reservations and ~~the~~ ^{the} ~~portion~~ portion of the spectrum in which it must find its future growth.

^{which promptly announced that it would provide for a reasonable transition period,} FCC has requested EIA to suggest a switchover date for start of all-channel receiver manufacture and to devise acceptable UHF tuner noise and ~~noise~~ sensitivity figures. Rule-making will probably be scheduled in September.

ETV NCTA AND EDUCATION

^{Washington was the site recently of} the biggest and most successful convention, ^{to date} of the Community Antenna operators. Appearance and participation of a number of high-level political figures testified to recognition of growing importance of this new aspect of the industry, i.e., Vice President Johnson; Congressman Oren Harris; Senators Fulbright, Magnuson, Morse, and Monroney; ~~NAEB President Harley~~ FCC Ch. Minnow.

NAEB President Harley participated in a panel on ETV, along with David Stewart, NETRC; Keith Engar, FCC; and John Guy Fowlkes, University of Wisconsin.

Harley praised CATV operators for assistance they are already providing by extending ETV service in many places and assured them that "in certain areas there would be a continuing need to serve schools, colleges, and homes that cannot be reasonably serviced by other means of television transmission."

On June 29, the Senate Committee on Agriculture and Forestry held hearings on a bill which would allow the REA to make loans to borrowers for the purpose of setting up CATV systems for educational purposes. The House has already passed the bill (H.R. 10708).

NEW RECEIVER FOR FOREIGN ETV

A major break-through in overcoming the problem of suitable receivers for development of ETV for mass education in newly-developing nations was announced recently. AID has awarded contract to Warwick Mfg. Co. of \$400,000 for 1,000 twenty-three inch transistorized battery operated set. This development is part of a ^{large AID program of} ~~type~~ program of AID ^{in exploring use of telecommunications for education. NAEB officials met recently with AID administrators concerning a proposed for comprehensive survey of the application of educational technology to African nations.} ~~is exploring use of telecommunications for education. NAEB officials met recently with AID administrators concerning a proposed for comprehensive survey of the application of educational technology to African nations.~~

Despite vigorous arguments by commercial broadcasters before the Senate Communications Subcommittee, there seems to be little likelihood that the equal-time requirement for political candidates will be removed. Suspension for 1964 elections, as advocated by ~~FCC and~~ President Kennedy, is probable, but permanent or wholesale elimination of the provision is not ~~likely~~. Senator Warren Magnuson (D.Wash.) has introduced a bill to end the requirement for broadcasts of presidential and vice-presidential candidates. Senator Hartke (D.-Ind.) is author of a bill seeking complete repeal of Sec. 315. FCC Chairman Minnow testified that he ~~xxx~~ preferred to see the section left intact.

ALL-CHANNEL RECEIVER DEVELOPMENTS

On July 10th the President signed the all-channel receiver bill requiring all TV receivers shipped in interstate commerce be capable of adequately receiving the 70 UHF as well as the 12 VHF channels. This is extremely important to education because of the boost it will give UHF, in which ETV has two-thirds of its reservations and in which portion of the spectrum it must find its future growth.

FCC, which promptly announced that it would provide for a reasonable transition period, has requested EIA to suggest a switchover date for start of all-channel receiver manufacture and to devise acceptable UHF tuner noise and sensitivity figures. Rule-making will probably be scheduled in September.

NCTA AND ETV

Washington was the site recently of the biggest and most successful convention to date of the Community Antenna operators. Appearance and participation of a number of high-level political figures testified to recognition of growing importance of this new aspect of the industry, i.e., Vice President Johnson; Congressman Oren Harris; Senators Fulbright, Magnuson, Morse, and Monroney; FCC Chm. Minow.

NAEB President Harley participated in a panel on ETV, along with David Stewart, NETRC; Keith Engar, FCC; and John Guy Fowlkes, University of Wisconsin.

Harley praised CATV operators for assistance they are already providing by extending ETV service in many places and assured them that "in certain areas there would be a continuing need to serve schools, colleges, and homes that cannot be reasonably serviced by other means of television transmission."

On June 29, the Senate Committee on Agriculture and Forestry held hearings on a bill which would allow the REA to make loans to borrowers for the purpose of setting up CATV systems for educational purposes. The House has already passed the bill (H.R. 10708).

NEW RECEIVER FOR FOREIGN ETV

A major break-through in overcoming the problem of suitable receivers for development of ETV for mass education in newly-developing nations was announced recently. AID has awarded contract to Warwick Mfg. Co. of \$400,000 for 1,000 twenty-three-inch transistorized battery operated sets. This development is part of a large AID program of exploring use of telecommunications for education. NAEB officials met recently with AID administrators concerning a proposal for comprehensive survey of the application of education technology to African nations.

SECTION 315

Despite vigorous arguments by commercial broadcasters before the Senate Communications Subcommittee, there seems to be little likelihood that the equal-time requirement for political candidates will be removed. Suspension for 1964 elections, as advocated by President Kennedy, is probable, but permanent or wholesale elimination of the provision is not. Senator Warren Magnuson (D.-Wash.) has introduced a bill to end the requirement for broadcasts of presidential and vice-presidential candidates; Senator Hartke (D.-Ind.) is author of a bill seeking complete repeal of Sec. 315. FCC Chairman Minow testified that he preferred to see the section left intact.

COMMISSION JOB STILL OPEN

MARKS TO HEAD STUDY

Leonard Marks, of Cohn ~~xxxx~~ & Marks, long-time general counsel for the NAEB, has been named head of a high-level committee of the Federal Communications Bar Assn. to study need for a new communications law. The committee will consider whether new legislation is needed or whether the 1934 law should be amended.

*Details from
p. 10 of 10*
Speculation is ~~xxxx~~ rife as to implications of President Kennedy's delay in naming a successor to FCC Commissioner John Cross, following expiration of his term June ~~XXXX~~ 30. Some feel Cross, strongly ~~backed by~~ backed by powerful *fellows* Akronsan Oren Harris, Chairman of the House Commerce Committee, will yet be reappointed; others are certain post will go to Ken Cox, Chief of Broadcast Bureau, backed by powerful fellow Washingtonian ~~Senator~~ Magnuson, Chairman of the Senate Commerce Committee. Resulting stalemate might result in a dark horse appointment.

~~NAEB officials met recently with high level AID administrators to discuss proposal for comprehensive survey of applications of educational technology to African nations.~~

FCC PETITIONS FOR RULEMAKING

Alabama

Idaho

BROADCAST ACTIONS

FCC ACTIONS

July 2, 1962

KUED (TV), University of Utah, Salt Lake City, Utah, Granted CP to change ERP to 138 kw, visual, and 69 kw, aural, and make other equipment changes; change antenna height to 3050 ft. (BPET-115)

July 3, 1962

Alabama Educational Television Commission (Mobile, Alabama) - Waived Section 3.685 of the rules and granted CP for a new noncommercial educational TV station to operate on Channel *42; ERP 17.8 kw visual and 8.9 kw aural; antenna height 600 ft.; condition (BPET-113). Applicant is licensee of educational TV stations WDIQ (Channel *2), Dozier, WBIQ (Channel *10), Birmingham, ~~and permittee of WAIQ (Channel *26)~~ and WCIQ (Channel *7), Mt. Cheaha State Park, and permittee of WAIQ (Channel *26), Montgomery. It proposes to interconnect the Mobile station by microwave with stations WBIQ, WCIQ And WDIQ.

July 3, 1962

By Notice of Further Proposed Rule Making in Docket 14364 concerning assignment of a lower UHF TV channel in Erie, Pa., comments are invited to a Commission proposal which would change Erie's UHF assignments from Channels 35, *41 (educational) and 66 to Channels 20, 26, 43 and *52 (educational); Channel 39 would be substituted for Channel 64 in Oil City; Channel 39 deleted from Sharon and Channel 43 from Butler; offset carrier on Channel 26 in Williamsport would be changed from plus to even; and Channel 37 deleted from Clymer, N.Y., and Channel 58 from Jamestown, N.Y. This proposal modifies a Feb. 15 plan by Great Lakes Television Co. (WSEE, Channel 35) for lower UHF channels in Erie.

July 5, 1962

The Commission ~~ix~~ invites comments by August 13 to Notice of Proposed Rule Making looking toward assigning Channel 10 to Midland, Texas, as petitioned for by Midland Telecasting Co., permittee of station KDCD-TV on Channel 18 in Midland, and reserving latter channel for noncommercial educational use. ~~It deferred action on KDCD-TV's request for issuance of a show cause order to modify its authorization accordingly.~~

July 9, 1962

WICR (FM), The Indiana Central University, Indianapolis, Ind. - Granted Mod. of CP to change ~~x~~ type of antenna

July 13, 1962

Granted renewal of license:
KHUF (FM), Houston, Texas

Granted license covering changes:
KETC (TV), St. Louis, Mo.

see next page (July 12)

WSUI, State University of Iowa, Iowa City, Ia. - Granted authority to operate with reduced power of 1 kw, non-directional antenna from Aug. 9 to Sept. 24, daytime only (Is licensed on 910 kc, 5 kw, DA-2, U).

FCC ACTIONS

July 3, 1962

Alabama Educational Television Commission (Mobile, Alabama) - Waived Section 3.685 of the rules and granted CP for a new noncommercial educational TV station to operate on Channel #42; ERP 17.8 kw visual and 8.9 kw aural; antenna height 600 ft.; condition (BPET-113). It proposed to interconnect the Mobile station by microwave with stations WBIQ, WCIQ and WDIQ.

By Notice of Further Proposed Rule Making in Docket 14364 concerning assignment of a lower UHF TV channel in Erie, Pa., comments are invited to a Commission proposal which would change Erie's UHF assignments from Channels 35, #41 (educational) and 66 to Channels 20, 26, 43 and #52 (educational); Channel 39 would be substituted for Channel 64 in Oil City; Channel 39 deleted from Sharon and Channel 43 from Butler; offset carrier on Channel 26 in Williamsport would be changed from plus to even; and Channel 37 deleted from Clymer, N.Y., and Channel 58 from Jamestown, N.Y.

July 5, 1962

The Commission invites comments by August 13 to Notice of Proposed Rule Making looking toward assigning Channel 10 to Midland, Texas, as petitioned for by Midland Telecasting Co., permittee of station KDCD-TV on Channel 18 in Midland, and reserving latter channel for noncommercial educational use.

MARKS TO HEAD STUDY

Leonard Marks, of Cohn & Marks, long-time general counsel for the NAEB, has been named head of a high-level committee of the Federal Communications Bar Assn. to study need for a new communications law. The committee will consider whether new legislation is needed or whether the 1934 law should be amended.

COMMISSION JOB STILL OPEN
